The world’s first 3D printed bridge in Venice by Zaha Hadid Architects, a New York corporate office building rooftop by 3deluxe, a new Google Store by reddymade, the Dubai 2020 EXPO pavilion by Santiago Calatrava, urban transit shelters by MicroSoft and JC Decaux, sustainable vertiports for electric drones by Giancarlo Zema, cardboard homeless shelters by Atelier OPA, a new science and engineering center at Harvard University by Behnisch Architekten, the world’s first watch made from recycled coffee beans by Lars Hoffman for Lilienthal, urban cooling lounges by Pininfarina, 3D printed Zero Emission Utility Vehicles by EOOS NEXT, the first green urban IKEA store in New York by 3deluxe, the world’s first lighting fixtures designed from recycled fishing nets by Signify, and sci-fi high altitude platform stations by Sceye, Inc.—all head the list of the new green products and projects awarded this year with Green Good Design.

For 2022, hundreds of product designs, graphics, architecture, landscape architecture, urban planning projects, together with visionary leaders, were submitted for GREEN GOOD DESIGN from over 40 nations. Under the banner, “Build A Better World Now,” designs for buildings and products that emphasize the most advanced “Green Approach” and the most sophisticated methods and technology to make the most positive impact on the environment were cited and awarded.

GREEN GOOD DESIGN AWARDS 2022
Add One

The 2022 GREEN building and product designs can be viewed at The Chicago Athenaeum’s website: gooddesign.org.

Founded in Chicago in 1950 by Eero Saarinen and Charles and Ray Eames, GOOD DESIGN remains the oldest and most established awards program for the most innovative and visionary new product design worldwide. For over 70 years now, the Award has been given to everything and anything from a NASA space ship to a paper clip. In 2021, over 1,100 new product designs and graphics from over 50 nations were recognized with the distinguished GOOD DESIGN Award. The world’s most prominent FORTUNE 500 companies use the GOOD DESIGN logo in the branding of their products, which has become a strong and effective mark of public recognition of Design Excellence globally.

Now, 71 years after the founding of GOOD DESIGN, The Chicago Athenaeum: Museum of Architecture and Design and The European Centre for Architecture Art Design and Urban Studies continues a special edition of GREEN GOOD DESIGN to focus on the most important new international products and buildings and construction and planning projects that are leading the global way to a design that is fully sustainable and compatible with the highest standards of good environment.

This year, a jury composed of The European Centre's International Advisory Committee selected over 150 new buildings, landscape projects, and product designs from over 30 nations as a new design direction for an even greater, more heightened awareness to protect the world's natural resources and the manufacturing and end-user's growing concerns for a healthy ecology and human environment. Conserve, reuse, retrofit, and recycle are prominent themes running across each awarded new product and building design.

“This program,” states Christian K. Narkiewicz-Laine, Museum President/CEO, The Chicago Athenaeum, dramatically indicates that the Green Movement is in full swing worldwide—from Singapore to Paris and Los Angeles. Architects and designers are quickly developing more and more interesting solutions to meet a more sustainable and ecologically correct future."

For 2022, awarded buildings, urban plans, and products from the following nations include: Austria, Belgium, Canada, China, Denmark, Finland, France, Germany, Greece, India, Italy, Ireland, Israel, Jamaica, Japan, Korea, Lebanon, Malaysia, México, New Zealand, Norway, Republic of Singapore, Spain, Sweden, Switzerland, Taiwan, The Netherlands, Turkey, United Arab Emirates, United Kingdom, United States, and Vietnam

More impressive is the list of visionary companies and industrial design firms producing state-of-the-art appliances, transportation products, kitchens, housewares, fixtures, building products, electronics, lighting, floorcovering, office furniture by such leading global firms as:

This year, Stacy Wolff, Global Head of Design for HP Inc’s Personal Systems business and responsible for the company’s leadership and focus on design innovation and sustainability is honored as the "Green Designer of the Year."

The GOOD DESIGN Award is an internationally recognized seal of quality with a history that spans more than 70 years as the world's first and oldest and most prestigious awards programs honoring the best, most innovative, and cutting-edge design today.

Experts from around the world serve as the jury, which meets yearly to identify the best new entries in product designs enviroments, graphics, packaging and communication design.

The GOOD DESIGN follows the original program first developed in 1950 by Eames and Saarinen at MoMA that assesses each product individually and comprehensively to identify the entries with the most outstanding design quality.

The 2022 Green GOOD DESIGN winners are featured in an upcoming book entitled Green GOOD DESIGN 2022, which is published by Metropolitan Arts Press Ltd.

Copies of the book can be ordered through metropolitanartspress.com or The European Centre in Athens, Greece by contacting Konstadina Geladaki at +30/210 342 8512 or konstadina@europeanarch.eu.

For press photographs contact Fachanan Conlon at TEL/FAX: +353/(0)1-670 8781 or by email at fachanan@europeanarch.eu.

About The Chicago Athenaeum (www.chi-athenaeum.org) is a global nonprofit education and research institute supported by its members. Its mission is to provide public education about the significance of architecture and design and how those disciplines can have a positive effect on the human environment.

About The European Centre for Architecture Art Design and Urban Studies (www.europeanarch.eu) is dedicated to public education concerning all aspects of the built environment - from entire cities to individual buildings - including the philosophical issues of arts and culture that ultimately give the final shape to design. A high emphasis exists on contemporary values and aesthetics, conservation and sustainability, and the theoretical exploration and advancement of art and design as the highest expression of culture and urbanism.

Green GOOD DESIGN is a special edition of The Chicago Athenaeum's annual GOOD DESIGN Awards, which was founded in Chicago in 1950 by Eero Saarinen and Charles and Ray Eames. The GOOD DESIGN logo was designed by Mort Goldsholl also in 1950.

Good Design® is a registered trademark of The Chicago Athenaeum: Museum of Architecture and Design in the US, UK, and EU.
